

# Ultra Spring

# Viasit Ultra Spring

**Viasit now offers even greater comfort and improved ergonomics for chairs in the workplace.**

The basic idea of coil springs traditionally associated with beds has been adapted and applied to office chairs.

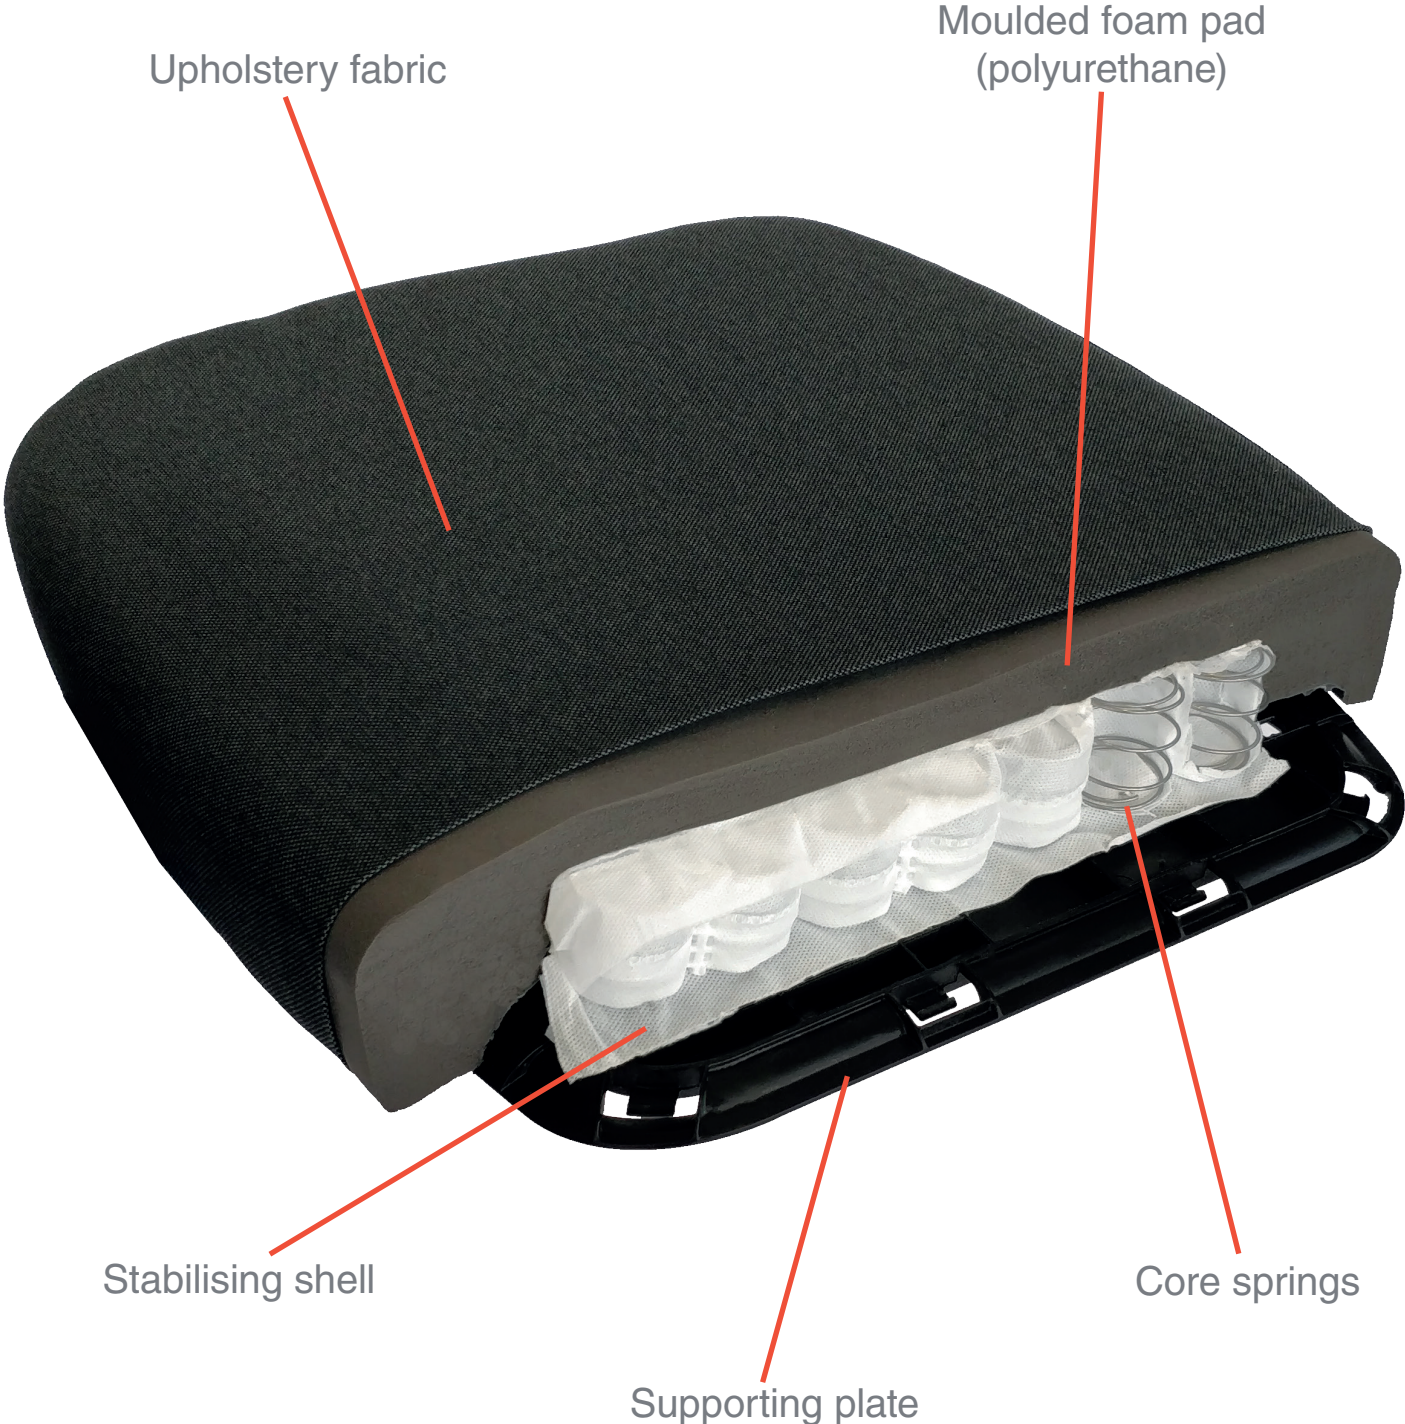

The result is “**Ultra Spring**”.

The main advantage: The moulded foam upholstery pad conceals 56 individual pocket springs located centrally, giving the user gentle support and extreme comfort thanks to numerous positive characteristics:

- Selective elasticity, i.e. only those springs under pressure move
- Easily adapts to suit the user's body
- Optimal weight and pressure distribution
- Increased level of comfort
- Relaxed sitting position
- Maintains a comfortable temperature and offers optimal hygienic properties thanks to improved temperature control.

This new feature is now available as a low-cost option for a number of Viasit's workplace chairs.
